Bruce G. Montgomery is Panelist at National Spring SBIR Conference

COLUMBIA, MD. **May 9, 2013** . . . Syntonics LLC, a leading provider of advanced technology radio frequency and RF-over-Fiber products, is pleased to announce that its president and founder, Mr. Bruce G. Montgomery, will be a panelist at the National Spring Small Business Innovation Research (SBIR) Conference on May 16.

Sponsored by the Department of Defense (DoD) Office of Small Business Programs (OSBP) and moderated by Mr. Christopher Rinaldi, DoD SBIR Program Administrator, the panel is titled, "Small Firms Discuss the Keys to Their DoD SBIR Program Success."

“Syntonics is a technology-driven manufacturing company,” said Mr. Montgomery. “We solve problems in the radio frequency domain to meet customer needs — although in many cases our customers didn’t realize what they needed until we invented and presented our innovative solutions. Our business model is to use SBIR/STTR projects and university partnerships to create new products and develop technologies, which we then commercialize.”

Syntonics provides advanced RF-over-Fiber systems and innovative RF technologies for military, civil, and industrial markets. FORAX™ (“Fiber Optic Remote Antenna eXtension”) RF-over-Fiber radio communications systems are deployed around the world in 24x7 mission critical operations. FORAX-HARC (High Antennas for Radio Communications) RF-over-Fiber radio relay systems are deployed today in Afghanistan in support of Operation Enduring Freedom. Our Handheld Tactical Satellite Antennas provide lightweight, rugged, high-gain performance in the field and our body-worn SINCGARS antennas have improved soldier safety.
